We publish this morning the first umber of a short series of papers by our minent townsman Judge Nicholas The papers all display the remarkable ability which characterizes the author. We need deration of the public.

The Hon. Alexander H. Stephens. f Georgia, advises that the wisest course or the people of the South is to remain quiet and await the issue of events, telling them that nothing which they can do will nfinence in any degree the policy of Congress. Mr. Stephens is one of the purest wisest, greatest, and best of living statesmen. In what he says to the South he is nquestionably correct, for he knows Congress and understands its designs as thor oughly as Congress knows itself and understands its own designs.

Preuning when Transplanting.—We consider it important to shorten back all fruittees, shrubs, and vines when transplanting. It lessens, by reducing the number of buils, the demand for supply on the roots as soon as that laid up in the bud is exhausted, and it gives increased vitality and vigor to the remaining buds, by giving to them the supply that would have been devoted to those removed, had they been left to remain. There is, however, room for study in the practice of heading in, because of the vigor of growth and power of producing strong new hoots being much greater in some sorts than others. The peach, for instance, may be cut buck to within two feets of the crown, leaving not a limb or twig, and yet the tree in the ensuing
